

## Dustex B3 Vacuum

The Dustex B3 Vacuum is a powerful triple-motor vacuum with an automatic filter-cleaning system, designed to collect high volumes of dust quickly.

Incorporating the Longopac Bag System, collected dust can be easily disposed of without risk of the operator coming into contact with the dust. It's 50mm intake allows it to perform any of three separate functions:

- Standard Vacuum Cleaning, using a floor cleaning wand to collect settled dust and debris
- On-tool Extraction for capturing high levels of dust produced by large equipment, such as scabblers.
- Floor—Cleaning Bar for quickly collecting dust from large floor areas. This 700mm wide bar enables large floor areas to be quickly vacuumed.

With high suction performance, the B3 will easily collect high volumes of dust and debris. An alarm will indicate if the wrong setting has been selected, the filter is full, or the hose is blocked.

Optional long hoses (5m and 10m) can be provided to access hard-to-reach areas.

### Features & Benefits

- ✓ H Class Filtration
- ✓ Powerful suction from a triple motor
- ✓ Automatic filter cleaning
- ✓ Rolling Floor-Cleaning Bar
- ✓ Anti-static
- ✓ 110v 32a

### Key Applications

- ✓ Construction Dust

## Dustex B3 Vacuum

### Technical Specification

Maximum Airflow	8,500 l/m
Pressure	24,000Pa
Motor Size	3.6KW
Voltage required	110v
Socket required	32a
Running Current	20 amps
Length	730 mm
Width	600 mm
Height	1570 mm
Weight, including filters	83 Kg
Collection	Longopac Bag
Noise Levels	60 DbA

### Filtration

H Class	Automatic cleaning system
---------	---------------------------

### Accessories

Vacuum Wand Set	4m 50mm anti-static hose Stainless steel curved hand tube Vacuum Wide Floor Foot
Floor-Cleaning Bar	700mm floor nozzle
Deep-Cleaning set	Crevice nozzle Brush nozzle 30mm nozzle

Optional fixed cleaning head for bin container versions increases productivity for wide areas.
